

# Symposium

Date :- 23/08/2022

Topic :- Global Warming :- Causes and impacts

Name of the faculty :-

- i) Bonti Hazarika BH
- ii) Dr. Guitima Talukdar GT
- iii) Brajen Medhi BM
- iv) Jitumani Deka JD
- v) Dikshita Sarma DS

Name of the participants :-

- i) Jangkita Rajbongshi
- ii) Pampi Rajbongshi
- iii) Barunali Nath
- iv) Mridusmita Rajbongshi
- v) Baranika Barman
- vi) Dikshita Baishya
- vii) Raishome Maj
- viii) Yasmin Sultana
- ix) Priyanka Baro
- x) Alaka Adhikari

A brief note :- The dept. of

Political Science Organised a Symposium in the departmental classroom CPAC-202 on the topic "Global Warming :- causes and

its impacts". Some of the students talk about the above mentioned topic.

Global Warming refers to the mainly rise in average temperature of the Earth's climate system. It is serious threat to all countries of the world.

It is caused by increased concentrations of greenhouse gases in the atmosphere.

There are various causes of global warming both natural and manmade. The natural one includes a greenhouse gas, volcanic eruption, methane gas and more. Next up, manmade causes are deforestation, mining, cattle rearing, fossil fuel burning and more.

The effects of global warming can be seen and felt across the planet. Global warming, the gradual heating of Earth's surface, oceans and atmosphere, is caused by human activity, primarily the burning of fossil fuels that pump carbon dioxide, methane and other greenhouse gases into the atmosphere.
